OVERVIEW
The business administration program offers a collaborative learning environment that prepares students for leadership roles in the public, private, and nonprofit sectors. Students develop a range of skills and competencies in this major, including leadership, communication, and problem-solving skills in a business environment. Business administration majors study how organizations and people interact within the context of today’s competitive global marketplace.

HIGHLIGHTS
Business administration comprises the largest number of majors at Lewis, but personalized interaction between faculty and students remains a top priority. Classes at Lewis are among the smallest in Illinois, providing opportunities for one-on-one instruction that are often not possible at larger institutions.

Lewis also offers business administration majors numerous opportunities to study abroad, giving students the chance to experience international business practices as well as other cultures. In these two-week semesters, students visit companies and universities in European cities such as Paris, London, Barcelona, Rome, Florence, and Madrid as well as in Mexico, South America, China, and Asia.

Ethics is an integral part of the business curriculum at Lewis. Our distinctive Lasallian values of wisdom and justice focus on the ability to reflect and make moral decisions within one’s professional and personal life, while promoting personal and social responsibility. Those qualities are highly desired by employers, particularly given recent events in corporations around the country.

CAREER OPPORTUNITIES
A degree in business administration offers tremendous flexibility and is a perfect complement to many other programs. Many students choose to double-major, combining the study of business administration with aviation, psychology, sports management, criminal/social justice, human resources, management information systems, and other areas, further expanding their career possibilities.

A business administration concentration also prepares students to manage people and processes in an organization of any size, with particular emphasis on managing in a rapidly changing global environment. Students in the business curriculum will utilize current business software in their class projects, so that they are prepared to enter the business workforce upon graduation.

- Service Industries
- Consumer Goods
- Government Agencies
- Insurance Companies
- Nonprofit Organizations
- Business Products and Services
- Banks and Financial Institutions
- Retail Management
- Hotel and Restaurant Management
- Pharmaceutical Sales
- Manufacturing
- Entrepreneurship

CLUBS AND ORGANIZATIONS

Students can join a number of clubs, organizations, and honor societies that provide activities and networking opportunities with alumni and other companies. Delta Sigma Pi is a professional fraternity organized to assist business majors in a number of areas. These include encouraging scholarship, social activities, and the association of students for their mutual advancement through research and practice, while bringing students in contact within the realm of commerce in real-world situations. Other business related organizations include the Society for Human Resource Management (SHRM), and the American Marketing Association (AMA).
