

BACHELOR OF SCIENCE INFORMATION TECHNOLOGY MANAGEMENT

TRANSFER GUIDE

Morton Community College Transfer Agreement

Shortly, you will be completing your education at Morton Community College and are now interested in continuing your education by enrolling in the Accelerated Degree Completion Program at Lewis University. You have the unique opportunity to transfer your Associate Degree to Lewis University in a smooth and seamless manner through the Transfer Agreement with Morton Community College. It is strongly recommended that you discuss your career and college plans with an advisor or counselor both at Morton Community College and Lewis University. This will ensure an accurate transition into the Accelerated Degree Completion Program.

Admission Requirements

- Should be 24 years of age.
- Have earned a minimum of 12 semester (18 quarters) hours of transferable credit at a regionally accredited post-secondary institution;
- Have earned a minimum of a 2.0 (4.0 scale) cumulative transfer GPA, based on all transferable courses to be considered for admission;
- Have at least 3 years of full-time work experience.

Credits earned through PLA cannot be used for satisfying the transfer credit hour requirement for admission into an accelerated degree program.

Business course grades of C or higher will be accepted for transfer into the major.

How to Enroll

- Complete the application at www.lewisu.edu/admissions/application.htm.
- Submit official transcripts for all college work and certifications. Transcripts should be mailed to:
Lewis University
Unit 621
One University Parkway
Romeoville, IL 60446-2200
- Meet with an enrollment representative from Lewis University for Orientation.

Master of Science in Information Security

The widespread usage of the World Wide Web is making it easier for people all over the world to access and exchange information. It is also making it easier to spread viruses. The challenge now is to ensure that computer systems are both secure and widely accessible. It is necessary to protect the information contained in information systems and to prevent malicious intrusion into them.

The Managerial Concentration focuses on the impact of information security on individual lives and personal privacy, the growing information security risks facing business and government, strategies for securing information, and the influence of laws and public policy on how information is secured. The Technical Concentration examines how information systems can be made secure. It discusses information processing systems, secure operating systems and application, network security, cryptography, security protocols and other issues that confront those charged with securing information networks.
