OVERVIEW

Human Resource Management (HRM) has become one of the most important aspects within business. The HRM degree program is the largest interdisciplinary major at Lewis University. Housed within the Psychology Department, the HRM program draws on courses from numerous departments including Psychology, Accounting, Business Administration, Economics, and MIS.

The HRM degree is designed for students who want a professional career that combines management responsibilities and the opportunity to work closely with people. Students receive both theoretical knowledge and skills development that train them to go directly into any employment situation. HRM graduates are prepared in the areas of selection, training, appraisal, compensation, organizational communication, database management and other HRM functions. Lewis HRM graduates work in the private sector, not-for-profit organizations, as well as the federal, state and local levels of government.

HIGHLIGHTS

Lewis HRM students can choose from a bachelor's degree, and a minor or a certificate (which does not require a degree or can be completed after receiving a degree). The program offers several options for completion. Students may attend classes full- or part-time, during the day or entirely at night. Opportunities for classes in accelerated and other alternative formats are available for returning and/or working students. The flexibility of the HRM program allows for double majors or minors in other areas to add educational depth.

The skill-based learning and diversity of the coursework gives students the knowledge to handle many different roles and prepare for the inevitable career shifts that face workers in today's economy. Internships offer students the opportunity to develop direct work experience, greater confidence and strong job credentials. Often interns receive job offers from their on-site employers.

HRM students share classes with others having common interests and are encouraged to set up personal networks to assist with courses and/or professional issues. The program has one of the highest percentages of minority and women students, representing a strong emphasis on diversity.

The Society for Human Resource Management (SHRM) has a professional chapter that meets on campus and encourages student participation. This is a valuable opportunity to network with HRM leaders in the region. A student chapter of SHRM provides further avenues for professional development. Lewis also is a registered provider for the SHRM seminar to prepare students for national certification ratings of the Professional in Human Resources (PHR) and the Senior Professional in Human Resources (SPHR) designations.

OBJECTIVES

Students earning a degree in Human Resource Management will be able to:

• Understand the broad areas of psychology, including behaviorism, psychodynamic theory, cognitive theory, humanistic theory and biological bases of behavior.
• Use knowledge of statistics and research design to plan and execute a research project.
• Criticize research conclusions.
• Understand direct, real-world application of psychological knowledge.
• Apply ethical reasoning to psychological work.

CAREER OPPORTUNITIES

The field of HRM offers career opportunities in all facets of employee relations, including:

• Affirmative Action Coordinator
• Compensation Manager
• Employee Benefits Manager
• Employee Welfare Manager
• Employment and Placement Manager
• Employment Recruiter
• Equal Employment Opportunity (EEO) Officer
• Human Resource Director
• Labor Relations Manager
• Mediator
• Occupational Analyst
• Training and Development Manager

The skills HR graduates learn are applicable in other fields requiring strong interpersonal and management skills including education, social and human services, law and public relations.

EMPLOYMENT OUTLOOK

The field of Human Resource Management can expect a positive outlook in job growth. HRM employment opportunities are expected to increase between 21 percent and 35 percent - faster than the national average for all occupations - through the year 2012 according to the U.S. Department of Labor's Bureau of Labor Statistics.
