Digital Badge Authorization Proposal and Issuance Information

The Digital Badge Proposal Application form should be submitted to the Lewis University Badge Governance Committee prior to issuance of badges.

Definition: Micro-credentials, are an institutional acknowledgements of academic or professional work that result in professional skill attainment. Micro-credentials can identify accomplishments in non-credit offerings of the university. They complement courses, certificates, and degrees and do not replace them. At Lewis University, we are awarding recognition of micro-credentials in the form of digital badges.

Requirements: All college/school, department, and program micro-credentials/badges must be approved by the Department Chair and Dean. Micro-credentials must adhere to institutional branding practices and must follow the established badging taxonomy. Micro-credentials must be issued using the institutionally approved platform (currently Credly via Acclaim).

Badge Title *

Must be a name not already in use, 50-character max. Consider naming conventions across your program when naming your badges.
Describe the badge. This is a short and concise description of the achievement. Ideally, this field should answer the question, "What is this individual capable of now that they have this badge?" Try to avoid statements that highlight what it takes to earn the badge, rather focus on what someone is capable of after they earn it. Try to avoid canned marketing language, like advertisements enticing people to take a course. Articulating the things someone is capable of doing now that they've earned the badge will make the badge more meaningful to someone unfamiliar with the course or learning activity you are badging. Focus less on topics covered, and more about what they mean for learners and the employers and others with whom they will share the badge. Example: Earners of the Microsoft Excel Specialist 2020 badge have a fundamental understanding of the Excel environment and the ability to complete tasks independently. They know and demonstrated the correct application of the principal features of Excel 2020. These candidates are able to create and edit a workbook with multiple sheets for a variety of purposes and situations.
